

I've been confounded by the insufficiency of my own vocabulary, and perhaps the English language, to articulate different types of "management."

Managing a project requires strong planning, organizing, communication, and problem-solving skills. You can entrust your projects to someone with these attributes if they also possess the necessary technical aptitude for the projects, as one cannot solve a problem that they do not know how to recognize nor have solutions prepared to resolve

About the Author

Chad Prinkey is CEO of [Well Built Construction Consulting](#), a Baltimore-based firm that delivers strategic consulting, facilitation services, and peer roundtables for construction executives.

About the Article

Republished from [Construction Dive](#) online. Construction Dive is a leading industry publication operated by Industry Dive. Their business journalists spark ideas and shape agendas for 10+ million decision makers in the most competitive industries. The daily email newsletter and website cover topics such as commercial building, residential building, green building, design, deals, regulations, and more.
